Product-Information

Wood Care for oiled floors

1. Product Description

Cleans and cares for all oiled and oiled/waxed wood and cork floors in one step. Top cleaning power with an optimum pH level. Provides a protective film with a silk finish.

2. Areas of Application

Oiled and waxed wood and cork floors.

3. Method of Application

Dilute Wood Care for oiled floors in a ratio of 1:100 (100 ml to 10 litres of water) and lightly wipe over the floor with this solution. Allow any surface dampness to dry. This provides the floor with a cleaning and care treatment in one single step.

Regular polishing increases the resistance of the protective film and is to be particularly recommended for areas subjected to extreme levels of wear and tear.

Consumption: 1 l = 500 m²

Note: Wood and cork are natural products and should never be exposed to damp or even wetness for longer periods of time since they can absorb water and change their shape as a result (swelling). Therefore always only lightly damp-wipe such floors (i.e., using well wrung-out cloths) and ensure that no "pools" are created on the floor. Repeated use of an excess dosage of Wood Care for oiled floors or moisture can result in an increase of slipperiness in the floor surface and thus to a reduction in its anti-slip properties.

4. Technical Data

pH level: 7.5 (concentrate)

Product code for cleaning and care products (Giscode): GU 40

Data on ingredients (EC recommendation): less than 5% soap, under 5% anionic surfactants, under 5% non-ionic surfactants. Contains preservatives. Other ingredients: process materials.

Wood Care for oiled floors should be stored in a cool, dry place in its closed original container. Protect from frost. Keep locked up and out of the reach of children.

Wood Floor Cleaner

5. Unit Sizes

6 x 750 ml

Art.-No. 0180075016
